Sustainable Design

EXPERIENCE:

UX/UI Consultant-Savvo Digital Jul 2015-present

- BeermapperApp Redesign: Successfully conducted usability testing through in person and online surveys. Designed print material for marketing events. Created wireframes that effectively communicate product function and intent, user interaction, and screen hierarchy.
- Creating a website for a seed startup looking to raise money through crowd sourcing for a dog day care and training facility in Chicago.

Web Design Student- Startup Institute Jun 2015-Aug 2015

- Worked closely with a team of designers to develop various website and mobile app designs within an Agile work environment.
- User-centered design conceptualization, wireframing for desktop and mobile.

Design Principal-Sarva Design:Seattle Mar 2011-Apr 2013

- After moving from India, I started freelancing as an interior design and homestaging consultant from my design shop.
- I worked in close collaboration with homeowners and realtors looking to remodel and/or stage to sell.
- All my projects were well executed and never exceeded budgets which the clients really appreciated.
- I was able to deliver on the design vocabulary of a different country efficiently.

Architect & Sole Proprietor: India 2003-2009

- Worked for 3 years in various roles from junior architect to design lead in two design firms. I got the opportunity to work on both large scale and small scale commercial & residential projects.
- I started my own design studio "Creating Spaces" in 2006 and very quickly had well established clients looking for complete design and build jobs as well as small remodels.
- Designed, managed and delivered on 6 projects in a year varying from homes to factories to landscaping.
- I designed three very unique restaurants for the same hospitality group. My scope of work included concept development, generating drawings and specifications, managing the project and traveling across India and China to source unique pieces for the space.
